

CHILDREN'S THERAPY CENTER

After Age Three ... Funding Stops. Needs Don't.

Children ages 3-18 are the most underserved age group for therapy services.

Children's
Therapy
Center  provides **\$3M**
in
uncompensated care
to **annually**
ensure services
for children ages 3-18.

WHY 

Federal funding
for Early Intervention
stops after age 3.

Special education
services in schools are
academically focused.

Pediatric therapy
centers are
few and far between.

Medical
reimbursements don't fully
cover the cost of service.
